

Mohamed Hossam Elnazer

Computing and Digital Technology Undergraduate

PROJECTS

Student Management Mini System (PHP & MySQL)

- Implemented full CRUD operations using PHP
- Integrated MySQL database with backend logic
- Structured responsive interface for efficient data handling

Office Network Design Simulation (Cisco Packet Tracer)

- Designed small-scale enterprise network with router and multiple VLANs
- Configured IP addressing and inter-VLAN routing
- Verified connectivity using network diagnostic tools

EDUCATION

school of Computing and Digital Technology

ELSCA University
2025 - 2028

American Diploma (High School)

Graduated with High Academic
Achievement

Activities

Wellness Club Active Member

Water Embassy Volunteer Ambassador,
Egypt

Computing and Digital Technology undergraduate focused on software development and database systems, with growing interest in Artificial Intelligence and machine learning. Currently building practical projects using PHP, MySQL, Git, and networking tools while strengthening problem-solving and programming fundamentals.
